

TRATAMIENTOS TERMICOS

la revista de los profesionales de los tratamientos térmicos

the business for several years to a low cost competitor, we were still willing to help out an old customer. After a visit on a Sunday by our engineering team, our customer thanked us for coming in and said he would no longer buy "cheap" belts anymore. He wanted a product that would last and that he wouldn't have to constantly repair. It turned out that while the upfront costs from our competition were initially attractive to the engineer/buyer, they ultimately proved more costly as the belt components wore down rapidly.

Wire Mesh Products has been around for over 40 years producing top quality products in the wire mesh industry. We are proud to be a second generation family business with over 750 satisfied customers. To speak to any of our professional representatives

AFC-HOLCROFT AWARDED ASSOCIATE MEMBER OF THE YEAR BY THE METAL TREATING INSTITUTE

At its October Fall Meeting in Nashville, Tennessee, the Metal Treating Institute (MTI), recognized AFC-Holcroft from Wixom, Michigan with the Associate Member of the Year Award.

AFC-Holcroft has played an instrumental role in delivering their expertise as a supplier serving MTI members and heat treating industry.

MTI Awards Chair, Jackie Peters stated at the Fall Meeting, "MTI has been able to serve the heat treating industry at the highest levels due to the support of suppliers members like AFC-Holcroft. The award was well deserved."

President, Bill Disler, accepted the award on behalf of AFC-Holcroft.

AFC-Holcroft has been a MTI member since 2008 and is engaged at many levels of MTI serving as a Diamond Member Supplier and exhibiting at MTI's trade show Furnaces North America. AFC-Holcroft has also graduated a few of their key executives from MTI's industry leading YES Management Training Program.

DORSSERS ADDS PIT TEMPERING FURNACES FOR PELLET DIE FINISHING DESIGNED BY SECO/WARWICK

SECO/WARWICK
INVENTION MEETS RELIABILITY

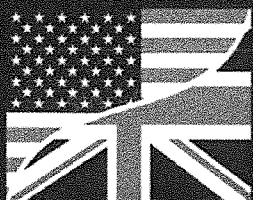

Dorssers, Inc. has purchased two SECO/WARWICK's pit style air temper furnaces for their manufacturing facility in Blenheim, Ontario, Canada.

Dorssers Inc. manufactures dies with a wide range of specifications depending on production requirements, quality needs and the type of ingredient to be pelletized. The pellet dies are large diameter, hardened steel dies with a multitude of holes gun-drilled for compressing various feed stocks. The environment is harsh, so exact heat treating is a must. The two electric

furnaces will be used to temper these dies used in agriculture, waste and pulp industries.

We have worked with SECO/WARWICK for years and we know they understand our need for rugged furnaces, along with our need for uniformity and precision controls for our expensive dies," remarked , Dorssers President, Peter

Timmermans, We have owned and operated SECO/WARWICK vacuum furnace equipment for many years, and find the control systems to be one of the best on the market." Jonathan Markley, SECO/WARWICK Corp. Managing Director added, We value our long term relationship with Dorssers as a technology innovator, particularly in the area of pellet dies."

The SECO/WARWICK Pit Furnaces feature a rugged, heavy duty industrial design for uniform convective heating. The furnaces, sold in two sizes, are offered as both electrically heated or gas fired with PLC control system and friendly HMI.

SPAIN HEAT TREATMENT CONGRESS 2017 - SEPT 27TH 2017 - BILBAO

<http://metalspain.com/heat-treatment.htm>

Papers

- Innovaciones en Carburizado de Baja Presión para Alta producción.
- Efecto de tratamientos térmicos en microestructura y propiedades de fatiga de aleación de titanio fabricada por fabricación aditiva.
- Innovaciones en tratamientos térmicos por inducción
- El poder de PDMetrics: Optimizando Operaciones con Mantenimiento Predictivo.
- More to come.

To present a paper, Please send only title of your paper for approval heat-treating@metalspain.com

20 minutes for each presentation, 10 minutes are reserved for audience questions. Powerpoint.

Sponsors more to come

See video of 2016 successful congress

<https://www.youtube.com/watch?v=oVCjmwOUHOE>

The audience is compounded of heat treatment professionals of main Spanish Heat Treating Shops in all metals industries (Automobile, Aerospace, Foundries, Forges, Molds industries etc).

FORD, ITP, NEMAK, TRW GEARBOX DEL PRAT, SEAT-VW, RAMADA, ALSTHOM HYDRO, IMESA, Grupo TTT, SUÑER, TRATAMIENTOS TERMICOS YURRE, EUSKAL FORGING, FUNDICION EN CASDARA MEIN, INAUXA, TEY, MANUFACTURAS ALFE, FUNDICIONES DE VERA, RECUBRIMIENTOS MUÑAGORRI, TRATAMIENTOS TERMICOS IRUÑA, TRATAMIENTOS TERMOQUIMICOS EIZEN, TRATERME, METALOGRAFICA, Tratamientos Térmicos SARASKETA, AYZAR, ESTAMCAL, TRATERNOR -TRATAMIENTOS TERMICOS DEL NORTE, ULMA FORJA, EISENOR, RAYZA, EKIN...present in previous congresses.

Stand is 390 euros (including table and chairs).

Registration attendee: 95.
