### FINANCIAL HIGHLIGHTS TRANSLATED INTO THE EURO

The table below presents average EUR/PLN exchange rates quoted by the National Bank of Poland for the periods covered by these financial statements and by the historical financial information:

| Financial year   | Dec 31 2009 | Dec 31 2008 |
|--|-------------|-------------|
| Average exchange rate for the period*                  | 4.3406      | 3.5321      |
| Exchange rate effective for the last day of the period | 4.1082      | 4.1724      |

\*) the average of the exchange rates effective for the last day of each month in the period

Assets and equity and liabilities in the consolidated statement of financial position have been translated using the EUR/PLN exchange rates quoted by the National Bank of Poland for the last day of the period.

Items of the consolidated statement of comprehensive income and the consolidated statement of cash flows have been translated using the exchange rates calculated as the arithmetic means of the EUR/PLN mid market rates quoted by the National Bank of Poland as effective for the last day of each month in the reporting period.

The table below presents key items of the statement of financial position, statement of comprehensive income and statement of cash flows disclosed in these consolidated financial statements and the comparable data, translated into the euro:

### *Financial Highlights -Consolidated*

| Item  | 2009       | 2008     | 2009       | 2008    |
|---|------------|----------|------------|---------|
|   | (PLN '000) |          | (EUR '000) |         |
| Net sales revenue                                   | 123,730    | 262,095  | 28,505     | 74,204  |
| Cost of sales                                       | -89,736    | -199,684 | -20,673    | -56,534 |
| Operating profit/(loss)                             | -77        | 25,388   | -18        | 7,188   |
| Pre-tax profit/(loss)                               | 44         | 17,111   | 10         | 4,844   |

## MANAGEMENT BOARD'S STATEMENT

In compliance with the requirements laid down in the Regulation of the Minister of Finance on current and periodic information to be published by issuers of securities, dated February 19th 2009, the Management Board of the Parent Undertaking represents that to the best of its knowledge these consolidated financial statements and the comparable data have been prepared in compliance with the accounting standards applicable to the Group and give an accurate, fair and clear view of the Group's assets, financial standing and financial performance.

These consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards ("IFRS") endorsed by the EU, and their scope is compliant with the requirements set forth in the Regulation of the Minister of Finance on current and periodic information to be published by issuers of securities, dated February 19th 2009 (Dz.U. of 2009

No. 33, item 259). These consolidated financial statements cover the period from January 1st to December 31st 2009 and the comparable period from January 1st to December 31st 2008.

The Management Board of the Parent Undertaking represents that the qualified auditor of financial statements that audited the consolidated financial statements was appointed in compliance with the applicable laws, and that both the auditing firm and the qualified auditors who performed the audit met the conditions required to issue an impartial and independent audit opinion, in accordance with the applicable provisions of the Polish law. In line with the corporate governance rules adopted by the Management Board, the auditor was selected by the Supervisory Board by virtue of Resolution No. 6/2009 of February 25th 2009 concerning appointment of the auditor. The Supervisory Board selected the auditor with due regard for the impartiality and objectivity of the selection itself as well as of the performance of tasks by the auditor.

**THE SECO/WARWICK GROUP**  
SUPPLEMENTARY INFORMATION  
TO THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEAR ENDED DECEMBER 31ST 2009

---

## I. Compliance with International Financial Reporting Standards

These consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards (“IFRS”) and the IFRS endorsed by the European Union. As at the date of approval of these financial statements for publication, given the ongoing process of implementation of the IFRS in the European Union and the scope of the Group’s business, as far as the accounting policies applied by the Group are concerned there are no differences between the IFRS which have come into force and the IFRS endorsed by the European Union.

The IFRS comprise standards and interpretations approved by the International Accounting Standards Boards (“IASB”) and the International Financial Reporting Interpretations Committee (“IFRIC”).

## II. Going Concern Assumption and Comparability of Accounts

These consolidated financial statements have been prepared on the assumption that the Group would continue as a going concern for the 12 months after the last balance-sheet date, i.e. December 31st 2009. As at the date of signing these financial statements, the Parent Undertaking’s Management Board was aware of no facts or circumstances that would involve a threat to the Group’s continuing as a going concern in the 12 months after the balance-sheet date, as a result of any planned or forced discontinuation or material downsizing of its existing operations.

By the date of these consolidated financial statements for 2009, no events occurred which have not but ought to have been disclosed in the accounting books for the reporting period. Concurrently, these financial statements do not report any significant events related to prior years.

## III. Basis of Consolidation

### a) Subsidiaries

A subsidiary is any undertaking with respect to which the Group has the power to govern its financial and operating policies. Such power is usually derived from the holding of the majority of the total vote in the undertaking’s governing bodies. While assessing whether the Group does control a given undertaking, the existence and effect of potential voting rights which may be exercised or converted at a given time are taken into consideration.

Subsidiaries are consolidated with using the full consolidation method starting from the date when the Group assumes control over them and cease to be consolidated when control is lost. Acquisitions of subsidiaries are accounted for by applying the acquisition method. Acquisition cost is measured as the fair value of the transferred assets, issued equity instruments and liabilities incurred or assumed at the date of exchange, plus costs directly related to the acquisition. The identifiable assets acquired, as well as the liabilities and contingent liabilities assumed as part of the business combination are initially measured at their respective acquisition-date fair values, irrespective of the value of any minority interests. Any excess of the acquisition cost over the fair value of the Group’s interest in the identifiable net assets acquired is recognised as goodwill. If the acquisition cost is lower than the fair value of the net assets of the acquiree, the difference is recognised directly in the income statement.

Income and expenses, receivables and payables, and unrealised gains arising from to intra-Group transactions are eliminated. Unrealised losses are also eliminated, but only to the extent there is no evidence of impairment of the asset transferred in the transaction. The accounting policies of subsidiaries have been changed whenever it was deemed necessary to align them with the accounting policies applied by the Group.

### b) Minority Interests and Transactions with Minority Shareholders

Minority interests represent those equity interests in consolidated undertakings which are not held by the Group. Minority interests are measured as such value of a related undertaking's net assets which as at the acquisition date is attributable to shareholders from outside the Group. This value is decreased/increased by any increases/decreases attributable to minority interests, with the reservation that losses may be attributed to minority interests only as far as they are covered by the minority interests. Any excess losses are charged against the Group's equity. The Group has followed the principle according to which transactions with minority shareholders are treated as transactions with third parties, not related to the Group.

### c) Associates

An associate is an undertaking over which the Group has significant influence, but not control. Significant influence is presumed to exist when the Group holds between 20 and 50 percent of the voting power in an undertaking's governing bodies. Investments in associates are accounted for using the equity method and are initially recognised at cost.

As from the acquisition date, the Group's share in an associate's net profit (loss) is recognised in the income statement, and the Group's share of the movements in the undertaking's other capitals is recognised under other capitals. The carrying amount of the investment is adjusted for the total changes as from the acquisition date.

### d) Companies Included in the Consolidated Financial Statements

The following Group undertakings have been included in these consolidated financial statements for the periods ended December 31st 2009 and December 31st 2008:

| Undertaking   | % of total vote    |             |
|---|--------------------|-------------|
|   | Dec 31 2009        | Dec 31 2008 |
| SECO/WARWICK S.A.                                   | Parent Undertaking |             |
| Lubuskie Zakłady Termotechniczne Elterma S.A.       | 100%               | 100%        |
| SECO/WARWICK Corp.                                  | 100%               | 100%        |
| SECO/WARWICK of Delaware, Inc                       | 100%               | 100%        |
| OOO SECO/WARWICK Group Moscow                       | 100%               | 100%        |
| Przedsiębiorstwo Handlowo-Usługowe Eltus Sp. z o.o. | 100%               | 100%        |
| SECO/WARWICK (Tianjin) Industrial Furnace Co. Ltd.  | 50%                | 50%         |
| Retech Systems LLC                                  | 50%                | 50%         |
| SECO/WARWICK Allied Pvt. Ltd.                       | 50%                | 50%         |

#### IV. Description of Adopted Accounting Policies, Including Methods of Measurement of Assets, Equity and Liabilities, Revenue and Expenses

These consolidated financial statements have been prepared based on a historical cost approach, except with respect to financial derivatives, which are measured at fair value through profit or loss (or in accordance with IAS 39 if hedge accounting is applied).

These consolidated financial statements are presented in the złoty ("PLN"), and unless specified otherwise, all the values are given in thousands of PLN.

##### Presentation of Financial Statements

###### Presentation of the statement of financial position

In accordance with IAS 1 *Presentation of financial statements*, assets and liabilities are presented in the balance sheet as current and non-current.

In accordance with IFRS 5, non-current assets held for sale are presented separately in the balance sheet.

###### Presentation of the statement of comprehensive income

In accordance with IAS 1 *Presentation of financial statements*, in the statement of comprehensive income expenses are presented by function.

###### Earnings per share

Net earnings per share for each period are determined by dividing net profit for the period by the weighted average number of shares in the period. The weighted average number of shares accounts for the dilutive effect related to the issue of shares at the Warsaw Stock Exchange.

##### Intangible Assets

As intangible assets the Group recognises such assets which are identifiable (they can be separated or sold), are controlled by the entity and are highly probable to bring future benefits to the entity.

Intangible items include mainly software and development expense, and are initially recognised at cost, which includes purchase price, import duties and non-deductible taxes included in the price, decreased by discounts and rebates and increased by all expenditure directly connected with the preparation of the asset for its intended use.

In order to determine whether a self-created intangible item meets the recognition criteria for an intangible asset, the entity distinguishes two phases in the asset origination process:

- the research phase,
- the development phase.

All costs originating in the first phase are charged directly to expense of the period.

Components of intangible items created as a result of development work are capitalised by the Group only if the following criteria are met:

- it is certain that the intangible item will be completed,
- the feasibility of the asset for use or sale can be demonstrated,
- the expenditure incurred can be measured reliably.

Goodwill arises on acquisition of a business entity and corresponds to the excess of the cost of the business combination over the acquiring entity's share of the fair value of net identifiable

assets, liabilities and contingent liabilities. Following initial recognition, goodwill is recognised at cost less cumulative impairment losses. Goodwill is not amortised.

The table below summarises the Group’s accounting policies with respect to intangible assets:

| <b>Item</b>                                       | <b>Patents and licences</b>  | <b>Computer software</b>  |
|---|--|---|
| Useful life                                       | 5 - 10 years   | 5 - 15 years  |
| Method used                                       | Amortised throughout the agreement term using the straight-line method | Amortised using the straight-line method                          |
| Origin  | Acquired   | Acquired  |
| Review for impairment / recoverable value testing | Annual assessment whether there are any indicators of impairment.      | Annual assessment whether there are any indicators of impairment. |

### Property, Plant and Equipment

Property, plant and equipment is carried at cost less cumulative depreciation and impairment losses, if any.

Depreciation is charged using the straight-line method by estimating the useful life of a given asset, which is:

|                          |                     |
|--------------------------|---------------------|
| Buildings and structures | from 10 to 40 years |
| Plant and equipment      | from 5 to 30 years  |
| Vehicles                 | from 5 to 10 years  |
| Other tangible assets    | from 5 to 15 years  |

Non-current assets held under finance lease agreements have been disclosed in the balance sheet equally with other non-current assets and are depreciated in the same way.

The initial values of non-current assets held under finance lease agreements and of the obligations corresponding with such assets have been determined at an amount equal to the discounted value of future lease payments. Lease payments made in the reporting period have been charged against finance lease liabilities in an amount equal to the principal instalment and the excess (the finance charge) has been charged in full to finance expense of the period.

Any gains and losses arising on a sale or liquidation are determined as the difference between the income from the sale and the net value of the tangible assets, and are included in the income statement.

The Group has adopted the rule that the residual value of tangible assets is always equal to “zero”.

### Tangible Assets under Construction

Tangible assets under construction include expenditure on property, plant and equipment and intangible assets which are not yet fit for use but it is highly probable that they will be completed. Tangible assets under construction are presented in the balance sheet at cost less impairment. Tangible assets under construction are not depreciated.

### Investment Property

The Group classifies as investment property all property which is considered a source of income (earns rentals) and/or is held for capital appreciation.

Investment property is carried at cost less cumulative depreciation and impairment losses, if any.

Depreciation is charged over the estimated useful life of the investment property, using the straight line method. Land is not depreciated.

### Financial Assets and Liabilities

**Financial assets** include interests in associates, assets at fair value through profit or loss, hedging derivatives, loans and receivables and cash and cash equivalents.

**Financial liabilities** include loans and borrowings, other types of financing, overdraft facilities, financial liabilities at fair value through profit or loss, hedging derivatives, trade payables, liabilities to suppliers of tangible assets, and lease liabilities.

Except for investments in subsidiaries, jointly controlled entities and associates, which are carried at cost in accordance with IAS 27 and IAS 28, financial assets and liabilities are recognised and measured in line with IAS 39 *Financial Instruments: Recognition and Measurement*.

#### *Recognition and Measurement of Financial Assets*

Upon initial recognition, financial assets are recognised at fair value which in the case of investments not measured at fair value through profit or loss is increased by transaction costs directly attributed to such assets.

##### Receivables

Trade receivables are recognised and carried at amounts initially invoiced, less impairment charges for doubtful receivables. Impairment charges for receivables are estimated when the collection of the full amount of a receivable is no longer probable.

If the effect of the time value of money is significant, the value of receivables is determined by discounting the projected future cash flows to their present value using a discount rate that reflects the current market estimates of the time value of money. If the discount method has been applied, any increase in the receivable with the passage of time is recognised as finance income.

Other receivables include in particular prepayments made in connection with planned purchases of property, plant and equipment, intangible assets and inventories. As non-monetary assets, prepayments are not discounted.

##### Cash and Cash Equivalents

Cash and cash equivalents are held mainly in connection with the need to meet the Group's current demand for cash and not for investment or any other purposes.

Cash and cash equivalents include cash in bank accounts, cash in hand, as well as all liquid instruments which may immediately be converted into cash of known amount and in the case of which the risk of value changes is insignificant.

#### *Recognition and Measurement of Financial Liabilities*

Liabilities under Loans and other financial liabilities are initially recognised at fair value and then carried at amortised cost using the effective interest method.

Transaction costs directly connected with an acquisition or issue of a financial liability increase the carrying value of the liability, because upon initial recognition the liability is recognised at the fair value of amounts paid or received in exchange for the liability. Thereafter, such costs are amortised throughout the term of existence of the liability, using effective interest.

### Hedge Accounting

Hedge accounting recognises the offsetting effects on the statement of comprehensive income of changes in the fair value of hedging instruments and the hedged items.

There are three types of hedging relationships:

- a) a fair value hedge: a hedge of the exposure to changes in the fair value of a recognised asset or liability or an identified portion of such an asset, liability or highly probable future liability that is attributable to a particular risk and could affect the statement of comprehensive income;
- b) a cash flow hedge: a hedge of the exposure to variability in cash flows that (i) is attributable to a particular risk associated with a recognised asset or liability and (ii) could affect the statement of comprehensive income;
- c) a hedge of a net investment in a foreign operation as defined in IAS 21.

A hedging relationship is subject to hedge accounting if, and only if, all of the following conditions are met:

- a) The hedging relationship is formally designated and documented, including the entity's risk management objective and strategy for undertaking the hedge, at the time when the hedge is undertaken. The relevant documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the hedged risk, as well as information how the entity will assess the hedging instrument's effectiveness in offsetting the exposure to changes in the fair value of the hedged item or cash flows attributable to the hedged risk.
- b) The hedge is expected to be highly effective in offsetting changes in fair value or cash flows attributable to the hedged risk, based on the originally documented risk management strategy pertaining to a given hedging relationship.
- c) In the case of a cash flow hedge, the contemplated transaction to which the hedge relates is highly probable and exposed to variability in cash flows, which may ultimately affect the statement of comprehensive income.
- d) The effectiveness of the hedge can be reliably measured, i.e. the fair value or cash flows of the hedged item attributable to the hedged risk, as well as the fair value of the hedging instrument, can be reliably measured.
- e) The hedge is assessed on an ongoing basis and determined to have been highly effective in all the reporting periods covered by the hedge.

### Inventories

Inventories are measured at cost, using a weighted average cost formula. A downward adjustment of the value of inventories to the net selling price is made by way of impairment charges. In addition, inventories that have become obsolete or unusable, and inventories whose usability has become in any way limited, are revalued at the end of each financial year. If the circumstances leading to a decrease in the value of inventories cease to apply, a reverse adjustment is made, i.e. inventories are remeasured at their pre-impairment value.

Impairment charges for inventories and stock-taking discrepancies are charged to cost of products sold.

### Deferred Income Tax

In line with IAS 12 *Income Taxes*, deferred income tax is determined using the liability method and recognised in the financial statements for all temporary differences between the carrying amounts of assets and liabilities and their tax values, as well as for unused tax loss carryforwards. A deferred tax asset is recognised for temporary differences to the extent it is probable that the asset will be realised and that taxable profit will be available against which the differences can be utilised. Unrecognised deferred tax assets are reviewed at each balance-

sheet date. A previously unrecognised deferred tax asset is recognised to the extent it is probable that there will be future taxable income against which the assets can be realised.

A deferred tax asset is recognised for all deductible temporary differences arising from investments in subsidiaries and associates only to the extent it is probable that:

- the temporary differences will reverse in the foreseeable future, and
- taxable profit will be available against which the temporary differences will be utilised.

In line with IAS 12, deferred tax assets and liabilities are not discounted. Deferred income tax is determined based on the tax rates that have been enacted or substantively enacted at the balance-sheet date.

### Provisions

A provision is recognised when the Group has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

If the Group anticipates that the costs for which provisions have been made will be recovered, e.g. under an insurance agreement, any such recovery is recognised as a separate item of assets, but only when it is practically certain to occur.

The cost related to a given provision is recognised in the statement of comprehensive income net of any recoveries. If the effect of time value of money is significant, the value of a provision is determined by discounting the projected future cash flows to their present value, using a pre-tax discount rate reflecting the current market estimates of the time value of money, as well as any risk associated with a given obligation. If the discount method has been applied, any increase in the provision with the passage of time is charged to finance expenses.

The estimates of outcome and financial effect are determined by the judgment of the companies' management, based on past experience of similar transactions and, in some cases, reports from independent experts.

Provisions are reviewed at each balance-sheet date and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision is reversed.

The Group creates the following provisions:

- provision for warranty repairs – on the basis of the historical cost of warranty repairs;
- provision for unused holidays – in an amount equivalent to the number of days of accrued unused holidays multiplied by average gross daily pay;
- provision for retirement benefits and length-of-service awards – calculated by actuaries;
- provision for employee benefits – bonus payments, salaries and wages;
- provision for probable costs related to the current financial year to be invoiced in the following year (accrued expenses). Depending on the type of accrued expenses, they are charged to costs of products sold, selling costs or general and administrative expenses;
- provision for a defined benefit plan. Fixed contributions are paid to a separate entity (a fund), as a consequence of which actuarial risk (that benefits will be lower than expected) and investment risk (that assets invested will be insufficient to meet the expected benefits) fall on the Group.

Assumptions underlying the estimates and the level of provisions are reviewed at each balance-sheet date.

### Accruals and Deferrals

In order to ensure the matching of revenues with related expenses, expenses or revenues relating to future periods are posted under liabilities of a given reporting period.

#### Accrued Expenses

The Group recognises accrued expenses at probable values of current-period liabilities arising in particular under:

- services provided to the Group by its business partners, where the liability can be reliably estimated,
- up to the estimated contract revenue, advances received under construction contracts reduce the receivables under settlement of long-term contracts.

#### Deferred and Accrued Income

Deferred/accrued income includes primarily government grants intended to finance assets and revenue, as well as any excess of estimated revenue related to the stage of completion of a long-term contract, in accordance with IAS 11, over advances received.

Government grants are disclosed in the statement of financial position at the amount of funds received and then recognised as income over the periods necessary to match them with the related costs they are intended to compensate, on a systematic basis. Government grants are not credited directly to equity.

Accruals and deferrals settled over a period longer than 12 months as from the balance-sheet date are classified as non-current accruals and deferrals, whereas those settled over a period of 12 months or shorter are classified as current accruals and deferrals.

### Functional Currency and Presentation Currency

#### *a) Functional Currency and Presentation Currency*

Items of the financial statements are measured in the currency of the primary economic environment in which the Company operates (“functional currency”). The financial statements are presented in the Polish zloty (PLN), which is the functional currency and the presentation currency of the Group.

#### *b) Transactions and Balances*

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of these transactions, as well as from balance-sheet valuation of monetary assets and liabilities expressed in foreign currencies, are recognised in the income statement, unless they are taken to equity (when they qualify for recognition as cash flow hedges or hedges of net investments).

### V. Material Judgments and Estimates

In view of the fact that many items presented in the consolidated financial statements cannot be measured accurately, certain estimates need to be made in the preparation of the consolidated financial statements. The Management Board reviews such estimates taking into account the

changes in the factors on which such estimates were based, new information and past experience. Therefore, the estimates made as at December 31st 2009 may change in the future.

#### Depreciation/Amortisation Charges

Depreciation/amortisation charges are determined based on the expected useful lives of property, plant and equipment and intangible assets. The Group reviews the useful lives of its assets annually, on the basis of current estimates.

#### Depreciation Charges for Tangible Assets Used under Finance Lease Agreements

Depreciation charges for items of property, plant and equipment and intangible assets used under finance lease agreements are determined based on their expected useful lives, which is consistent with depreciation policy for assets that are owned. Useful lives equal to agreement term are not applied. The Group assumes that assets used under lease agreements must be purchased.

#### Deferred Tax Assets

Deferred tax assets are recognised in respect of all unused tax losses to be deducted in the future to the extent it is probable that taxable profit will be available which will enable these losses to be utilised.

#### Provision for Unused Holidays

Provision for accrued employee holidays is determined based on the number of days of accrued unused holidays as at the end of the reporting period.

#### Provision for Old-Age and Disability Retirement Benefits

Old-age and disability retirement severance pays are paid to employees of the Group's subsidiaries operating under the Polish law in accordance with the provisions of Art. 92 of the Polish Labour Code, whereas at foreign companies such severance pays are paid in accordance with the local labour laws. Actuarial valuation of long- and short-term benefits is performed at the end of each financial year.

#### Provision for warranty repairs

Provision for warranty repairs is calculated on the basis of the historical costs of manufacturing the equipment sold and of the warranty repairs made in the previous years.

#### Long-Term Contracts

To account for long-term contracts, the Group applies the provisions of IAS 11 *Construction Contracts*. When the outcome of a construction contract can be estimated reliably, the percentage of completion method is used. The stage of completion is determined by reference to the contract costs incurred to date and the total costs planned to be incurred.

At the end of each reporting period, the Group makes estimates regarding the outcome of each contract. When it is probable that total contract costs will exceed total contract revenue, the expected loss is immediately recognised in the income statement.

The amount of such a loss is determined irrespective of: whether or not work has commenced on the contract, the stage of completion of contract activity, or the amount of profits expected to arise on other contracts which are not treated as single construction contracts in accordance with paragraph 9 of IAS 11.

The Group applies the above rules to account for commercial contracts related to the Group's core business whose performance term exceeds three months and whose total value is material from the point of view of reliability of the financial statements (revenue, expenses, and the financial result). The Group accrue only documented revenue, i.e. revenue which is guaranteed under the original contract, adjusted by any subsequent amendments to the original contract (annexes), or which constitutes any other revenue closely related to the project. Any changes of

the contract revenue are taken into account if it is certain (i.e. a contract or annexes to a contract have been signed) or at least a highly probable (i.e. annexes to a contract or preliminary contracts have been initialled) that the client will accept the amendments and the revenue amounts provided for in the amendments, and such revenue can be reliably measured.

The stage of completion of a contract is determined by reference to the contract costs actually incurred in the reporting period and documented by appropriate accounting evidence, and the cooperator costs not yet invoiced, provided that all of the following conditions are met:

- a) such costs can be measured reliably,
- b) the value of the cooperation contract is PLN 250,000 – PLN 500,000,
- c) the contract performance term is longer than three months.

The revenue as at the end of the reporting period is determined by reference to the stage of completion of the contract, net of any revenue which affected the financial result in previous reporting periods. Estimated contract revenue attributable to the given reporting period is recognised as sales revenue for the period, and disclosed under assets in the statement of financial position as receivables under settlement of long-term contracts.

Any excess of advances received under a contract over the estimated revenue attributable to a given reporting period is recognised under liabilities as prepaid deliveries. Up to the amount of the estimated contract revenue, advances reduce the receivables under settlement of long-term contracts.

Any excess of invoiced revenue is recognised as deferred income.

#### Derivative Financial Instruments

Derivative financial instruments are remeasured at the end of each reporting period at their fair value as determined by the bank.

### **Subjective Judgment**

Where a given transaction does not fall within the scope of any standard or interpretation, the Management Board relies on its subjective judgment to determine and apply accounting policies which will ensure that the financial statements contain only relevant and reliable information and that they:

- give an accurate, clear and fair view of the Group's assets, its financial standing, results of operations and cash flows,
- reflect the economic substance of transactions,
- are objective,
- conform with the principles of prudent valuation,
- are complete in all material respects.

Subjective judgments as at December 31st 2009 were made with respect to contingent liabilities and provisions for claims.

## **VI. Changes in Accounting Policies**

Below are presented new standards and IFRIC interpretations which have been published by the International Accounting Standards Board and are effective for reporting periods beginning on or after January 1st 2009.

➤ *IFRS 8 Operating Segments*

IFRS 8 was issued by the International Accounting Standards Board on November 30th 2006 and is effective for annual periods beginning on or after January 1st 2009. IFRS 8 replaces IAS 14 *Segment Reporting*. The standard defines new requirements regarding segment reporting and disclosure of information on products and services, geographical areas in which the entity operates, and main customers. IFRS 8 requires a management approach to reporting on financial performance of operating segments.

➤ *Amendment to IFRS 2 Share-Based Payments*

The amendment to IFRS 2 was published by the International Accounting Standards Board on January 17th 2008 and is effective for annual periods beginning on or after January 1st 2009. The amendment deals with two matters: (1) it clarifies that vesting conditions are service conditions and performance conditions only, while other features of a share-based payment are not vesting conditions and (2) it specifies that all cancellations, whether by the entity or by other parties, should receive the same accounting treatment.

➤ *Revised IAS 23 Borrowing Costs*

Revised IAS 23 was published by the International Accounting Standards Board on March 29th 2007 and is effective for annual periods beginning on or after January 1st 2009. The amendment requires capitalisation of borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset (i.e. an asset that takes a substantial period of time to get ready for its intended use or sale). Under the revised standard, it is no longer possible to expense borrowing costs immediately in the period in which they are incurred.

➤ *IFRIC 13 Customer Loyalty Programmes*

IFRIC 13 was issued by the International Financial Reporting Interpretations Committee on June 28th 2007 and is effective for annual periods beginning on or after January 1st 2009. The Interpretation addresses how companies that grant their customers credits or points under loyalty schemes or card programmes should account for transactions under such schemes and programmes. In particular, IFRIC 13 shows the correct way of accounting for the obligation to provide free or discounted goods or services if and when the customers redeem the points.

➤ *IFRIC 14 The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction*

IFRIC 14 was issued by the International Financial Reporting Interpretations Committee on July 9th 2007 and is effective for annual periods beginning on or after January 1st 2009. The Interpretation addresses how entities should determine the limit placed by IAS 19 on the amount of a surplus of the fair value of assets in a defined benefit plan over the present value of the defined benefit obligations which they can recognise as an asset. Moreover, IFRIC 14 addresses how the minimum statutory or contractual funding requirements may affect the amount of an asset or obligation under a defined benefit plan.

➤ *Revised IAS 1 Presentation of Financial Statements*

Revised IAS 1 was published by the International Accounting Standards Board on September 6th 2007 and is effective for annual periods beginning on or after January 1st 2009. The changes introduced by the Group relate mainly to the presentation of items of income and expenses, as the Group decided to present two separate income statements (a statement of comprehensive income

and a statement of comprehensive income) and to the presentation of equity. These changes were introduced to help users of financial statements to analyse and compare the information.

- Amendments to IAS 32 *Financial Instruments: Disclosure and Presentation*, and to IAS 1 *Presentation of Financial Statements*

Amendments to IAS 32 and IAS 1 were published by the International Accounting Standards Board on February 14th 2008 and are effective for annual periods beginning on or after January 1st 2009. The amendments address the issue of accounting for particular types of financial instruments that have characteristics similar to equity instruments but are at present classified as financial liabilities. Under the amended standard, financial instruments such as puttable financial instruments and instruments that impose on entities an obligation to deliver to another party a share of the net assets of the entity only on liquidation should be classified as equity, provided they meet specific conditions.

- Improvements to IFRSs 2008

In May 2008, the International Accounting Standards Board issued Improvements to IFRSs – a collection of amendments to 20 standards. The amendments involve accounting changes for presentation, recognition and measurement purposes as well as terminology and editorial changes. Most of the amendments are effective for annual periods beginning on or after January 1st 2009.

- Amendments to IFRS 1 *First-Time Adoption of International Financial Reporting Standards*, and to IAS 27 *Consolidated and Separate Financial Statements*

Amendments to IFRS 1 and IAS 27 were published by the International Accounting Standards Board on May 22nd 2008 and are effective for annual periods beginning on or after January 1st 2009. The amended standards allow first-time adopters to use a deemed cost of either fair value or the carrying amount under previous accounting practice to measure the initial cost of investments in subsidiaries, jointly controlled entities and associates in the separate financial statements.

- Amendment to IAS 39 *Financial Instruments: Recognition and Measurement – Eligible Hedged Items*

The amendment to IAS 39 *Eligible Hedged Items* was published by the International Accounting Standards Board on July 31st 2008 and is effective for annual periods beginning on or after July 1st 2009. The amendment clarifies how the principles that determine whether a hedged risk or portion of cash flows is eligible for designation as a hedged item should be applied in particular situations. The amendment prohibits designating inflation as a hedgeable component of a fixed rate debt instrument. It also forbids including time value in the one-sided hedged risk when designating options as hedges.

- Amendments to IFRS 7 *Financial Instruments: Disclosures*

The amendments to IFRS 7 *Financial Instruments: Disclosures* were published by the International Accounting Standards Board on March 5th 2009 and are effective from January 1st 2009. The amendments introduce a three-level fair value disclosure hierarchy and require additional disclosures about the relative reliability of fair value measurements. Moreover, the amendments clarify and enhance existing disclosure requirements concerning liquidity risk.

The Management Board does not expect the above standards and interpretations to have any significant effect on the accounting policies followed by the Company, other than the need to

make certain additional or new disclosures. The Company is in the process of analysing the consequences and effects of applying these new standards and interpretations on its financial statements.

## VII. New Standards to Be Applied by the Group

Below are presented new standards and IFRIC interpretations which have been published by the International Accounting Standards Board but are not effective for the current reporting period.

### ➤ Revised IFRS 3 *Business Combinations*

Revised IFRS 3 was published by the International Accounting Standards Board on January 10th 2008 and is effective prospectively for annual periods beginning on or after July 1st 2009. The revised standard continues to apply the acquisition method of accounting for business combinations, however with some significant changes. For instance, all payments to purchase a business should be recognised at their acquisition-date fair value, with contingent payments classified as debt subsequently remeasured through profit or loss. Additionally, the revised standard defines new rules of applying the acquisition method, including a requirement to recognise acquisition-related costs as expenses in the period in which they are incurred. Moreover, there is a choice to measure the minority interest (non-controlling interest) in an acquiree either at fair value or as the non-controlling interest's proportionate share of the acquiree's net identifiable assets.

The Group will apply the revised IFRS 3 starting from the annual financial statements for the period that begins on January 1st 2010.

### ➤ Revised IAS 27 *Consolidated and Separate Financial Statements*

Revised IAS 27 was published by the International Accounting Standards Board on January 10th 2008 and is effective for annual periods beginning on or after July 1st 2009. The standard requires that the effects of transactions with minority shareholders be presented within equity as long as the entity remains under the control of the existing parent. The standard provides also a more detailed guidance on disclosure in the event of loss of control over a subsidiary, i.e. it requires that the residual holding be remeasured to fair value and the difference recognised in profit or loss.

The Group will apply the revised IAS 27 prospectively to transactions with minority shareholders (holders of non-controlling interest) starting from the annual financial statements for the period that begins on January 1st 2010.

### ➤ Amendments to IFRIC 9 and IAS 39 *Embedded Derivatives*

The amendments to IFRIC 9 and IAS 39 *Embedded Derivatives* were published by the International Accounting Standards Board on March 12th 2009 and are effective for annual periods ended on or after June 30th 2009.

The amendments constitute an improvement on the amendments to IFRIC 9 and IAS 39 issued in October 2008 concerning embedded derivatives. The amendments clarify that on reclassification of a financial asset out of the "at fair value through profit or loss" category all embedded derivatives have to be assessed and, if necessary, separately accounted for in the financial statements.

The Group will apply amendments to IFRIC 9 and IAS 39 from January 1st 2010.

➤ Improvements to IFRSs 2009

On April 16th 2009, the International Accounting Standards Board published Improvements to IFRSs 2009 – a collection of amendments to 12 standards. The amendments involve accounting changes for presentation, recognition and measurement purposes as well as terminology and editorial changes. Most of the amendments are effective for annual periods beginning on or after January 1st 2010.

➤ Amendments to IFRS 1 *First-Time Adoption of IFRSs*

Amendments to IFRS 1 *First-Time Adoption of IFRSs* were published by the International Accounting Standards Board on July 23rd 2009 and are effective for annual periods beginning on or after January 1st 2010. The amendments introduce additional exemptions from asset valuation as at the date of first-time adoption of the IFRSs for entities operating in the oil and gas sectors.

➤ Amendments to IFRS 2 *Share-Based Payments*

Amendments to IFRS 2 *Share-Based Payments* were published by the International Accounting Standards Board on June 18th 2009 and are effective for annual periods beginning on or after January 1st 2010. The amendments clarify the accounting for group cash-settled share-based payment transactions. The amendments specify the scope of IFRS 2 and regulate the interaction of IFRS 2 and other standards. The amendments to IFRS 2 also incorporate guidance previously included in IFRIC 8 and IFRIC 11.

➤ IFRIC 12 *Service Concession Arrangements*

Interpretation IFRIC 12 was issued by the International Financial Reporting Interpretations Committee on November 30th 2006 and is effective for annual periods beginning on or after March 29th 2009. The interpretation provides guidance for application of the existing standards by entities participating in service concession arrangements between the private and the public sector. IFRIC 12 applies to contracts under which the grantor controls the kind of services that the operator provides using the infrastructure, as well as the recipient and price of these services.

The Group will apply IFRIC 12 starting from the annual financial statements for the period that begins on January 1st 2010.

➤ IFRIC 15 *Agreements for the Construction of Real Estate*

Interpretation IFRIC 15 was issued by the International Financial Reporting Interpretations Committee on July 3rd 2008 and is effective for annual periods beginning on or after January 1st 2010. The Interpretation provides guidance on how to determine whether an agreement for the construction of real estate should fall within the scope of IAS 11 *Construction Contracts* or IAS 18 *Revenue* for the purpose of presentation in financial statements. Moreover, IFRIC 15 clarifies when to recognise the revenue from provision of construction services.

➤ IFRIC 16 *Hedges of a Net Investment in a Foreign Operation*

Interpretation IFRIC 16 was issued by the International Financial Reporting Interpretations Committee on July 3rd 2008 and is effective for annual periods beginning on or after July 1st 2009. The interpretation provides guidance on how to determine whether risk arises from the foreign currency exposure to the functional currency of the foreign operation and the presentation currency of the parent entity's consolidated financial statements. Moreover, IFRIC 16 clarifies which entity within a group can hold a hedging instrument in a hedge of a net investment in a foreign operation and in particular whether the parent entity holding the net investment in a

foreign operation must also hold the hedging instrument. IFRIC 16 explains also how an entity should determine the amounts to be reclassified from equity to profit or loss for both the hedging instrument and the hedged item when the entity disposes of the investment.

The Group will apply IFRIC 16 starting from the annual financial statements for the period that begins on January 1st 2010.

➤ *IFRIC 17 Distributions of Non-Cash Assets to Owners*

Interpretation IFRIC 17 was issued by the International Financial Reporting Interpretations Committee on November 27th 2008 and is effective for annual periods beginning on or after July 1st 2009. The interpretation provides guidance on the moment of recognition of dividend, measurement of dividend and recognition of the difference between the value of dividend and the carrying amount of the distributed assets.

The Group will apply IFRIC 17 starting from the annual financial statements for the period that begins on January 1st 2010.

➤ *IFRIC 18 Transfer of Assets from Customers*

Interpretation IFRIC 18 was issued by the International Financial Reporting Interpretations Committee on January 29th 2009 and is effective for annual periods beginning on or after July 1st 2009. The interpretation provides guidance on the recognition of transfer of assets from customers, namely it clarifies the circumstances in which the definition of an asset is met, the identification of the separately identifiable services (services in exchange for the transferred asset), the recognition of revenue and the accounting for transfers of cash from customers.

The Group will apply IFRIC 18 starting from the annual financial statements for the period that begins on January 1st 2010.

**Alternative Approaches under the IFRSs Chosen by the Group**

Some IFRSs allow application of alternative methods for the measurement or recognition of assets and liabilities. The table below provides information on the approaches chosen by the Group:

| Standard                                    | Alternative approach applied by the Group  |
|---|--|
| IAS 2 <i>Inventories</i>                    | Inventories are measured at cost, determined using the weighted average cost method.                               |
| IAS 16 <i>Property, Plant and Equipment</i> | Property, plant and equipment are carried at cost less accumulated depreciation and accumulated impairment losses. |
| IAS 38 <i>Intangible Assets</i>             | Intangible assets are carried at cost less accumulated depreciation and accumulated impairment losses.             |

## **THE SECO/WARWICK GROUP**

ADDITIONAL NOTES AND EXPLANATIONS TO  
THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEAR ENDED DECEMBER 31ST 2009

---

## Note 1. SALES REVENUE

As provided for under IAS 18, revenue from sale of products, goods for resale, materials and services, net of VAT, discounts and rebates, is recognised when the entity has transferred to the buyer the significant risks and rewards incidental to their ownership.

### Sales revenue and total revenue and income of the Group:

| Item                                   | 2009           | 2008           |
|--|----------------|----------------|
| Sale of products                       | 122,567        | 260,315        |
| Sale of goods for resale and materials | 1,163          | 1,780          |
| <b>TOTAL sales revenue</b>             | <b>123,730</b> | <b>262,095</b> |
| Other operating income                 | 2,244          | 1,319          |
| Finance income                         | 1,440          | 2,709          |
| <b>TOTAL revenue and income</b>        | <b>127,414</b> | <b>266,123</b> |

The Group did not carry any revenue from discontinued operations.

## Note 2. OPERATING SEGMENTS

IFRS 8 *Operating Segments*, which has superseded previously binding IAS 14 *Segment Reporting*, is effective as of January 1st 2009. The new standard introduces the “management approach” to segment disclosures and requires that segment information be presented based on those components of the entity that management monitors in making decisions about operating matters. An operating segment is a component of an entity for which discrete financial information is available and whose operating results are reviewed regularly by the entity’s chief decision maker to make decisions about resources to be allocated to the segment and assess its performance. This change in accounting standards has had no impact on the Group’s segment reporting.

The SECO/WARWICK Group’s business comprises the following segments:

### Vacuum Furnaces

Vacuum furnaces have multiple applications in a number of industries, including the machine tool, aviation, energy, electrical engineering, medical equipment, automotive and specialised industries. The vacuum furnace solutions may be used in a wide variety of processes such as heat treatment of steel and alloys, brazing, sintering, and degassing. Vacuum furnaces are not only economically efficient but also environmentally friendly.

### Controlled Atmosphere Aluminum Brazing (CAB)

The CAB systems are used primarily in the automotive industry for brazing heat exchangers mounted in passenger cars and trucks (charge air coolers, air conditioning evaporators and condensers, oil coolers, etc.). Outside the automotive sector, CAB processes are used in the manufacture of IC radiators, steam condensers for CHP plants, exhaust gas heat exchangers for power generators, etc.

### Atmosphere Furnaces

Atmosphere furnaces are widely used in the process of heat and/or chemical treatment of steel and metals in protective atmospheres for improved hardness. Atmosphere furnaces designed for heat and chemical treatment are employed in the gas carburising, gas nitriding and other processes. The furnaces are meant chiefly for the automotive and metal industries, including for the manufacturing

of anti-friction bearings, as well as for use in commercial hardening plants and specialised industries.

### Aluminium Process

The SECO/WARWICK Group specialises in a selected range of aluminium heat treat processes which generally offer a plethora of applications. The aluminium process solutions offered by the Group are used in the production of aluminium sheet for the automotive and aviation industries, as well as for the manufacturing of packaging foil for multiple applications. In addition, the aluminium process systems are used to heat treat aluminium castings.

### Melting Furnaces

The metallurgy applications of the vacuum melting furnaces include alloying, melting and purifying specialty metals, including reactive metals (e.g. titanium, zirconium) and heat-resistant metals (e.g. tantalum). Due to their physical properties, specialty metals may only be treated with the use of advanced technological solutions under high vacuum conditions.

The different types of melting furnaces include melting and holding furnaces used for the manufacture of precision castings (such as components of jet engines, power turbines, and medical implants).

Melting furnaces may also be used as an element of the globally-unique processes involving disposal of hazardous waste (such as nuclear by-products).

### Other

Reportable geographical segments, delineated based on the geographical location of the respective sales markets, are as follows:

- domestic market (Poland),
- the EU market (excluding Poland),
- the market of Russia and former USSR countries (Russia and former USSR countries)
- the US market,
- the Turkish market (Turkey),
- other countries.

Segment reporting covers only revenues and income, costs and expenses, and the financial result of a given operating segment. It is impracticable for the Group to allocate assets to the particular segments as its plant and equipment (including buildings and structures) is common to all the segments.

## OPERATING SEGMENTS IN 2009

| Item  | Continuing operations |               |                     |                   |                  |               | Discontinued operations | Unallocated items | Total operations |
|---|-----------------------|---------------|---------------------|-------------------|------------------|---------------|-------------------------|-------------------|------------------|
|   | Vacuum Furnaces       | CAB           | Atmosphere Furnaces | Aluminium Process | Melting Furnaces | Total         |                         |                   |                  |
| <b>Total segment revenue</b>  | 30,316                | 28,689        | 25,176              | 9,885             | 5,311            | 99,377        |                         | 24,353            | <b>123,730</b>   |
| External sales, including:  | 30,316                | 28,689        | 25,176              | 9,885             | 5,311            | 99,377        |                         | 24,353            | 123,730          |
| - sales to customers who account for 10% or more of total segment revenue     | 19,570                | 22,793        | 17,338              | 6,068             | 4,670            | 70,439        |                         | 3,700             | 74,139           |
| Inter-segment sales   |                       |               |                     |                   |                  |               |                         |                   |                  |
| <b>Total costs and expenses</b>   | (23,295)              | (14,871)      | (19,979)            | (8,855)           | (3,368)          | (70,368)      |                         | (19,368)          | <b>(89,736)</b>  |
| General and administrative expenses   |                       |               |                     |                   |                  |               |                         | (25,040)          | (25,040)         |
| Selling costs   |                       |               |                     |                   |                  |               |                         | (9,620)           | (9,620)          |

#### **Note 7. DISCONTINUED OPERATIONS**

No operations have been discontinued at the Group.

In the period January 1st – December 31st 2009, the Group carried no assets or liabilities classified as held for sale.

#### **Note 8. EARNINGS PER SHARE**

Basic earnings per share are calculated by dividing the net profit for a given period attributable to holders of ordinary shares by the weighted average number of outstanding ordinary shares in that period.

Diluted earnings per share are calculated by dividing the net profit for a given period attributable to holders of ordinary shares (net of interest on redeemable preference shares convertible to ordinary shares) by the weighted average number of outstanding ordinary shares in that period (adjusted for

the effect of dilutive options and dilutive redeemable preference shares convertible to ordinary shares).

| Item  | Dec 31 2009  | Dec 31 2008   |
|---|--------------|---------------|
| Net profit on continuing operations attributable to shareholders                                      | (960)        | 14,678        |
| Loss on continuing operations attributable to shareholders  |              |               |
| Net profit attributable to owners of the parent   | (960)        | 14,678        |
| Interest on redeemable preference shares convertible to ordinary shares                               |              |               |

### Note 15. INVESTMENTS IN ASSOCIATES ACCOUNTED FOR USING THE EQUITY METHOD

#### Retech Systems LLC

The Group holds ordinary shares representing 50% of the share capital of Retech Systems LLC, which confer the right to 50% of the total vote at the general shareholders meeting of Retech. The remaining 50% of votes are held by Mr James A. Goltz. The shares in Retech were acquired by the SECO/WARWICK Group under the share purchase agreement of July 19th 2007.

| Item                          | Dec 31 2009 | Dec 31 2008 |
|-------------------------------|-------------|-------------|
| Current assets                | 34,492      | 60,009      |
| Non-current assets            | 1,332       | 1,512       |
| Current liabilities           | 10,738      | 38,156      |
| Non-current liabilities       | -           | -           |
| Share of net assets           | 12,738      | 6,480       |
| Revenue                       | 116,929     | 159,343     |
| Net profit/(loss)             | 13,603      | 11,123      |
| Share of profit of associate: | 50%         | 50%         |

The Parent Undertaking does not control Retech Systems LLC within the meaning of IFRS 3 because it is not able to govern the company's financial and operational policies. Mr Jeffrey Boswell is a member of the Management Board of Retech Systems LLC and does not perform any current operational duties towards Retech Systems LLC. Given the above, and considering the fact that SECO/WARWICK holds more than 20% and less than 51% of ordinary shares in the net assets of the acquired company, the Management Board of the Parent Undertaking believes that SECO/WARWICK has "significant influence" over the acquired entity. In view of the above, the investment in Retech Systems LLC has been accounted for using the equity method in accordance with IAS 28.

The table below presents the fair value of identifiable assets and liabilities of Retech Systems LLC as at the acquisition date.

| Item   | Dec 31 2009   | Dec 31 2008   |
|--|---------------|---------------|
| Goodwill   | 19,320        | 19,320        |
| Share of net assets as at the balance-sheet date         | 12,738        | 6,480         |
| Exchange differences on translation of goodwill          | (2,047)       | 1,746         |
| <b>Investment in associate</b>                           | <b>30,011</b> | <b>27,546</b> |
| Acquisition cost   | 16,596        | 16,596        |
| Share of profit of associate – 2007                      | 2,328         | 2,328         |
| Share of profit of associate – 2008                      | 5,562         | 5,562         |
| Share of profit of associate – 2009                      | 6,802         | -             |
| Exchange differences on translation of foreign operation | 1,399         | 3,059         |
| Change in net assets not related to financial result     | 324           | -             |
| <b>Investment in associate</b>                           | <b>33,011</b> | <b>27,546</b> |

As prescribed under IAS 12.44, the Group recognises deferred tax assets related to deductible temporary differences arising from investments in associates only to the extent it is probable that the temporary differences will reverse in the foreseeable future.

The Management Board of the Parent Undertaking intends the investment in Retech Systems LLC to be a long-term investment (currently there are no plans to sell the shares). In view of that and in accordance with IAS 12.44, no deferred tax assets were not recognised in respect of the deductible temporary differences arising from investments in associates.

#### **SECO/WARWICK Allied Pvt. Ltd.**

The Group holds ordinary shares representing 50% of the share capital of SECO/WARWICK Allied Pvt. Ltd., which confer the right to 50% of the total vote at the general shareholders meeting of SECO/WARWICK Allied Pvt. Ltd., an Indian law company. The remaining 50% of votes are held by Messrs U. Rao, N. Rajgopal and V.N. Nasta.

The shares in SECO/WARWICK Allied Pvt. Ltd. were acquired by the SECO/WARWICK Group under the share purchase agreement of April 1st 2008.

| Item                          | Dec 31 2009 | Dec 31 2008 |
|-------------------------------|-------------|-------------|
| Current assets                | 25,292      | 29,123      |
| Non-current assets            | 4,262       | 1,557       |
| Current liabilities           | 15,295      | 17,609      |
| Non-current liabilities       | 3,465       | 3,605       |
| Share of net assets           | 7,032       | 6,447       |
| Revenue                       | 40,192      | 22,966*     |
| Net profit/(loss)             | 409         | 797*        |
| Share of profit of associate: | 50%         | 50%         |

\* for the period April 1st – December 31st 2008.

The Parent Undertaking does not control SECO/WARWICK Allied Pvt. Ltd. within the meaning of IFRS 3 because it is not able to govern the company's financial and operational policies. Messrs Jeffrey Boswell, Wojciech Modrzyk (Member of Management Board of the Parent Undertaking) and Piotr Walasek (Chief Financial Officer of the SECO/WARWICK Group) are members of the six-person Management Board of SECO/WARWICK Allied Pvt. Ltd. and do not perform any current operational duties towards SECO/WARWICK Allied Pvt. Ltd. Given the above, and considering the fact that SECO/WARWICK holds more than 20% and less than 51% of ordinary shares in the net assets of the acquired company, the Management Board of the Parent Undertaking believes that SECO/WARWICK has "significant influence" over the acquired entity. In view of the above, the investment in SECO/WARWICK Allied Pvt. Ltd. has been accounted for using the equity method in accordance with IAS 28.

The table below presents the fair value of identifiable assets and liabilities of SECO/WARWICK Allied Pvt. Ltd. as at the acquisition date.

| Item  | Carrying value immediately before the acquisition | Fair value on acquisition |
|---|---|---------------------------|
| Property, plant and equipment                   | 1,395   | 4,670                     |
| Intangible assets                               | -   | -                         |
| Accruals and deferrals                          | -   | -                         |
| Deferred tax assets                             | 5   | 5                         |
| Cash and cash equivalents                       | 3,704   | 3,704                     |
| Trade receivables                               | 11,171  | 11,171                    |
| Inventories                                     | 3,662   | 3,662                     |
| Other assets                                    | 2,969   | 2,969                     |
| Trade payables                                  | (14,180)  | (14,180)                  |
| Other liabilities                               | (1,846)   | (1,846)                   |
| Debt under loans                                | (1,911)   | (1,911)                   |
| Deferred tax liabilities                        | (22)  | (22)                      |
| <b>Net assets</b>                               | <b>4,921</b>                                      | <b>8,222</b>              |
| <b>Parent Undertaking's share of net assets</b> | <b>2,461</b>                                      | <b>4,111</b>              |

As at the acquisition date, the fair value of identifiable assets exceeded the book value of net assets by PLN 3,275 thousand, of which PLN 1,638 thousand is attributable to the parent. The difference between the book value and the fair value is due to the valuation of property, plant and equipment (in accordance with the Indian GAAP, items of property, plant and equipment are carried at historical cost). As required under IFRS 3, the excess of the fair value of identifiable net assets over the book value of net assets was taken into consideration when accounting for the acquisition and decreased the goodwill.

The acquisition of 50% of shares in SECO/WARWICK Allied Pvt. Ltd. has been accounted for as follows:

| Item   | Apr 1 2008    |               |  |
|--|---------------|---------------|--|
| Acquisition cost   | 10,995        |               |  |
| Share of net assets as at the acquisition date           | 4,111         |               |  |
| <b>Goodwill as at the acquisition date</b>               | <b>6,884</b>  |               |  |
| Item   | Dec 31 2009   | Dec 31 2008   |  |
| Goodwill   | 6,884         | 6,884         |  |
| Share of net assets as at the balance-sheet date         | 7,032         | 6,447         |  |
| Exchange differences on translation of goodwill          | 841           | 784           |  |
| <b>Investment in associate</b>                           | <b>14,757</b> | <b>14,115</b> |  |
| Acquisition cost   | 10,995        | 10,995        |  |
| Share of profit of associate – 2008                      | 398           | 398           |  |
| Share of profit of associate – 2009                      | 204           | -             |  |
| Payment for preference shares                            | 1,852         | 1,513         |  |
| Exchange differences on translation of foreign operation | 1,308         | 1,209         |  |
| <b>Investment in associate</b>                           | <b>14,757</b> | <b>14,115</b> |  |

As prescribed under IAS 12.44, the Group recognises deferred tax assets related to deductible temporary differences arising from investments in associates only to the extent it is probable that the temporary differences will reverse in the foreseeable future.

The Management Board of the Parent Undertaking intends the investment in SECO/WARWICK Allied Pvt. Ltd. to be a long-term investment (currently there are no plans to sell the shares). In view of that and in accordance with IAS 12.44, no deferred tax assets were not recognised in respect of the deductible temporary differences arising from investments in associates.

| Impairment loss (positive value)         |               |              |
| <b>Gross trade and other receivables</b> | <b>28,009</b> | <b>4,558</b> |

The Group pursues a policy of entering into sales agreements only with customers whose reliability it has checked. Management believes that thanks to this policy there is no additional credit risk beyond the level defined by the impairment losses recognised with respect to the Company's uncollectible trade receivables.

As at December 31st 2009, trade receivables of PLN 1,063 thousand (in 2008: PLN 1,525 thousand) were classified as unrecoverable and accordingly covered by a relevant impairment charge.

The changes in impairment losses on receivables were as follows:

| Item   | Dec 31 2009  | Dec 31 2008  |
|--|--------------|--------------|
| <b>As at beginning of period</b>   | <b>1,525</b> | <b>533</b>   |
| Increase   | 505          | 1,041        |
| Impairment losses used (-)   | (953)        | (27)         |
| Unused amounts written off (-)   |              | (44)         |
| Discount rate adjustment (-)   |              |              |
| Net exchange differences on translation of financial statements into presentation currency | (14)         | 21           |
| <b>As at end of period</b>   | <b>1,063</b> | <b>1,525</b> |

Maturity structure of trade receivables (gross) (as from the balance-sheet date):

| Trade receivables maturing in          | Dec 31 2009   | Dec 31 2008   |
|--|---------------|---------------|

**Disclosures Concerning Derivative Financial Instruments which Meet the Hedge Accounting Criteria**

In 2009, SECO/WARWICK S.A. hedged up to 75% of its export cash flows denominated in the euro and up to 90% of the cash flows denominated in the US dollar using currency forwards. The purpose was to ensure that the budgeted exchange rates for contracts are met. Any changes in the value of the EUR- or USD-denominated cash flows are offset by changes in the fair value of the hedging instrument. Hedge accounting is applied if all the criteria in accordance with par. 88 of IAS 39 are met. Any negative balance-sheet valuation of derivative instruments is recognised directly in equity. If a transaction which has been hedged with a currency forward affects the income statement, any negative valuation previously recognised in equity is reclassified into the income statement. Fair value of currency forward contracts was determined by the Bank which is party to the transaction.

The table below presents details of each hedging relationship as at December 31st 2009.

|              | Nominal amount of the contract (EUR '000) | Notional amount of the hedging instrument (EUR '000) | Fair value of the hedging instrument (PLN '000) | Amount recognised in the income statement (PLN '000) | Amount recognised in equity (PLN '000) | Date of expected cash flow |

#### Disclosures Concerning Derivative Financial Instruments Which Do not Meet the Hedge Accounting Criteria

On August 22nd 2008, SECO/WARWICK S.A. entered into a structured forward contract with Citibank Handlowy S.A. of Warsaw. As at the balance-sheet date, the Company is under the obligation to sell in aggregate EUR 2,550 thousand at the EUR/PLN exchange rate of 3.33. The purpose of entering into the transaction was to ensure that the budgeted exchange rate for contracts is met. As at the balance sheet-date, the fair value of the financial instrument was PLN -1,981 thousand as determined by the Bank which is party to the transaction.

On April 21st 2009, SECO/WARWICK S.A. entered into a zero-cost forward contract at WGT. Under the contract, SECO/WARWICK S.A. has the right to sell at the EUR/PLN exchange rate not lower than 4.20 and not higher than 4.66. As at the balance-sheet date, the Company is obliged to sell EUR 2,400 thousand. The purpose of entering into the transaction was to ensure that the budgeted exchange rate for contracts is met. As at the balance-sheet date, the fair value of the financial instrument was PLN 290 thousand.

On May 14th 2009, SECO/WARWICK S.A. entered into a zero-cost forward contract at WGT. Under the contract, SECO/WARWICK S.A. has the right to sell at the EUR/PLN exchange rate not lower than 4.20 and not higher than 4.84. As at the balance-sheet date, the Company is obliged to sell EUR 1,800 thousand. The purpose of entering into the transaction was to ensure that the budgeted exchange rate for a contract is met. As at the balance-sheet date, the fair value of the financial instrument was PLN 220 thousand.

On August 3rd 2009, SECO/WARWICK S.A. purchased a put option at WGT, under which the Company has the right to sell euro at the EUR/PLN exchange rate not lower than 4.6. The Company paid a premium on the purchased option in the amount of 0.505 grosz per each euro of

the transaction value. As at the balance-sheet date, the Company is obliged to sell EUR 500 thousand. The purpose of entering into the transaction was to ensure that the budgeted exchange rate for a contract is met. As at the balance-sheet date, the fair value of the financial instrument was PLN -19 thousand.

On July 13th 2009, Lubuskie Zakłady Termotechniczne „Elterma” S.A. entered into the following currency options with BRE BANK S.A. of Warsaw as part of a zero-cost collar strategy:

- purchased a PUT option for EUR 1,000,000, with the exercise price of EUR/PLN 4.2, maturing on April 14th 2010;
- sold a CALL option for EUR 1,000,000, with the exercise price of EUR/PLN 4.7070, maturing on April 14th 2010.

As at the balance-sheet date, the fair value of the financial instrument was PLN 143,150.19 as determined by the Bank which is party to the transaction.

The total value of all executed currency transactions was EUR 1,000,000 (PLN 4,404,500 as at the date of the transactions). The purpose of entering into the currency options was to ensure that the budgeted exchange rate for signed contracts is met.

#### Social Assets and Liabilities of the Company Social Benefits Fund (Polish Companies)

The Act on Company Social Benefits Fund of March 4th 1994 (as amended) stipulates that an employer should set up a Social Benefits Fund if it has more than 20 full-time employees. The Company has set up such a Fund and makes periodic contributions to the Fund in the amount of the basic contribution / contribution agreed upon with the trade unions. Additionally, the Fund holds some property, plant and equipment. The Fund is used to subsidise the Company's social activity, loans advanced to the employees and other social expenses.

The Group set off the Fund's assets against its liabilities towards the Fund, as the Fund's assets do not represent a separate asset category.

The table below presents analytic data on the Fund's assets, liabilities and expenses, as well as the net balance of the Fund.

| Item  |     | Dec 31 2008 |
|---|-----|-------------|
| Total tangible assets contributed to the Fund     |     | -           |
| Loans advanced to employees                       | 76  | 116         |
| Cash  | 309 | 237         |
| Liabilities to the Fund                           | 60  |             |
| Net balance                                       | 322 | 278         |
| Contributions to the Fund during financial period | 489 | 528         |

#### Investment Commitments

As at December 31st 2009, the Group had capital commitments of PLN 52 thousand (in 2008: PLN 39 thousand) for expenditures related to acquisition of property, plant and equipment. The amount will be used to purchase of new machines and equipment.

## Note 27. PROVISIONS

### EMPLOYEE BENEFITS

#### Retirement Benefits and other Post-Employment Benefits

Retiring employees of the Polish companies in the Group have been entitled to retirement severance pays in an amount established pursuant to the Polish Labour Code. Therefore, based on a valuation prepared by a qualified actuary, the Group creates a provision for the present value of the retirement severance pay obligations. The table below provides information on the amount of the provision and a reconciliation presenting changes in the provision during the financial period.

#### Provision for retirement severance pays and similar benefits

| <b>LONG-TERM PROVISION FOR RETIREMENT BENEFITS AND SEVERANCE PAYS</b> | <b>Jan 1 – Dec 31 2009</b> | <b>Jan 1 – Dec 31 2008</b> |

### Note 33. EMPLOYMENT STRUCTURE

| Item                         | Dec 31 2009 | Dec 31 2008 |
|------------------------------|-------------|-------------|
| Blue-collar employees        | 234         | 288         |
| White-collar employees       | 340         | 390         |
| Employees on parental leaves | 2           | 3           |
| <b>Total</b>                 | <b>576</b>  | <b>681</b>  |

- excluding employees of SECO/WARWICK (Tianjin) Industrial Furnace Company Limited, which is consolidated using the proportional consolidation method. In 2009, the Tianjin-based company employed 76 persons (77 persons in 2008).
- excluding employees of SECO/WARWICK ALLIED and RETECH Systems, which are consolidated using the equity method. In 2009, SECO/WARWICK ALLIED employed 240 persons (238 persons in 2008) and RETECH Systems employed 100 persons (114 in 2008).

### Note 34. CAPITAL MANAGEMENT

The primary objective behind the Group's capital management is to maintain good credit rating and safe capital ratios, in order to support the Group's operations and enhance its shareholder value.

The Group manages its capital structure and modifies it in response to changes in the economic environment. To maintain or adjust its capital structure, the Company may make changes regarding dividend distributions, return capital to the shareholders or issue new shares. During the year ended December 31st 2009, there were no changes regarding the capital structure management objectives, policies and processes.

In monitoring its capital, the Group uses the leverage ratio calculated as net debt divided by total equity plus net debt. The Group's net debt includes interest-bearing loans and borrowings, trade payables and other liabilities, less cash and cash equivalents. Equity includes convertible preference shares and equity attributable to equity holders of the parent, less capital reserve from unrealised net gains.

### Note 35. GOODWILL IMPAIRMENT TEST

The goodwill reported by the Group arose on acquisition of control over SECO/WARWICK Corporation by SECO/WARWICK S.A. and was allocated to a single cash-generating unit, being SECO/WARWICK Corporation.

#### Carrying value of goodwill:

| Dec 31 2008 | Dec 31 2009 |
|-------------|-------------|
| 4,452       | 4,284       |

#### Cash-Generating Unit

The recoverable value of the cash-generating unit was determined on the basis of its value in use, which in turn was calculated based on the cash flow projections derived from the financial budgets covering a period of ten years. The cash flow projections were discounted using a pre-tax discount rate of 9.0%; cash flows beyond the period of five years were estimated using a growth rate of 2%.

#### Key Assumptions Underlying Value-in-Use Calculation

Estimates of the value in use of a cash-generating unit are sensitive to changes of the following variables:

- pre-tax margin;
- discount rates;
- market share in the budget period; and
- growth rate used to estimate cash flows beyond the budget period.

*Pre-tax margin* – pre-tax margin is based on the average values in the three years preceding the budget period.

*Discount rate* – discount rate reflects the management's assessment of the risk inherent in the company's operations. It is used by the management with a view to assessing the operating efficiency (performance) and future investment proposals. The discount rate was determined taking into account the yield on 10-year bonds as at the beginning of a budget year.

Assumptions regarding market share – such assumptions are material because – in addition to using industry data to determine the growth rate (as described below) – the management assesses how the company's assets and financial standing may change over the budget period relative to its peers. The management expects the Group's market share to remain stable over the budget period.

Estimated growth rate – growth rates are based on published findings of industry surveys.

#### Sensitivity to Changes of Assumptions

With respect to the estimation of the value in use of SECO/WARWICK Corporation, management believes that no reasonably possible change of any of the key assumptions referred to above could cause the carrying value of the cash-generating unit to exceed its recoverable value. As at the

balance-sheet date, the value in use of the cash generating unit was PLN 45,437 thousand, while the book value of equity was PLN 11,120 thousand. The residual value, equal to the difference between the market value and the book value of equity, was PLN 34,317 thousand and exceeded the goodwill disclosed in the consolidated financial statements. Accordingly, no impairment loss on goodwill was recognised.

### Note 36. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICY

In the course of its operating and financing activities, the SECO/WARWICK Group is exposed to risks arising mainly in connection with the financial instruments held by the Group. Those risks may be broadly defined as market risk, comprising currency risk, interest-rate risk, liquidity risk and credit risk. The objective behind the Group's financial risk management is to offset any adverse movements in foreign exchange and interest rates, stabilise cash flows and ensure an adequate level of liquidity and financial flexibility. The rules of financial risk management within the Group are determined by the Management Board of the Parent Undertaking. As part of the risk management process, an expert management accounting system has been developed and implemented. The key risk parameters at the level of the Group members' operating and financing activities are monitored through monthly reports.

#### 36.1 Currency Risk

The Group is exposed to currency risk, arising in connection with sales, trade receivables, financial liabilities and bank loans denominated in EUR and USD. Additionally, in the consolidated financial statements there is a risk related to exchange differences on translating foreign operations. This risk is especially significant with respect to SECO/WARWICK Corporation and Retech Systems LLC.

#### **Analysis of the SECO/WARWICK Group's sensitivity to fluctuations in PLN/USD and PLN/EUR exchange rates**

Assuming a 10% decrease in the value of the US dollar against the zloty as at December 31st 2009 (with all other factors remaining unchanged), both the SECO/WARWICK Group's net earnings for the financial year 2009 and its equity would be lower by PLN -943 thousand (for 2008, the respective figures would be PLN -1,644 thousand and PLN -3,140 thousand). Conversely, assuming a 10% increase in the value of the US dollar against the zloty (all other factors remaining unchanged), both the Group's net earnings for the financial year 2009 and its equity would be higher by PLN +935 thousand (for 2008: PLN +1,664 thousand and PLN +3,140 thousand, respectively).

Assuming a 10% decrease in the value of the euro against the zloty as at December 31st 2009 (with all other factors remaining unchanged), both the Group's net earnings for the financial year 2009 and its equity would be lower by PLN -4,621 thousand (for 2008, the respective figures would be PLN -13,231 thousand and PLN -13,051 thousand). Conversely, assuming a 10% increase in the value of the euro against the zloty (with all other factors remaining unchanged), both the Group's net earnings for the financial year 2009 and its equity would be higher by PLN +4,856 thousand (for 2008: PLN +13,231 thousand and PLN +13,051 thousand, respectively).

Assumptions adopted for 2009:

- average USD/PLN exchange rate used to translate items of the income statement: 3.1111
- average EUR/PLN exchange rate used to translate items of the income statement: 4.3277
- USD/PLN exchange rate as at the end of the period used to translate items of the balance sheet: 2.8503

- EUR/PLN exchange rate as at the end of the period used to translate items of the balance sheet: 4.1082

Assumptions adopted for 2008:

- average USD/PLN exchange rate used to translate items of the income statement: 2.4115
- average EUR/PLN exchange rate used to translate items of the income statement: 3.5321
- USD/PLN exchange rate as at the end of the period used to translate items of the balance sheet: 2.9618
- EUR/PLN exchange rate as at the end of the period used to translate items of the balance sheet: 4.1724

### 36.2 Interest Rate Risk

The SECO/WARWICK Group's exposure to interest rate risk is not material, due to the fact that the share of interest-bearing debt in the Group's total financing structure is relatively low.

### 36.3 Risk Related to Product Prices

The bulk of the Group's sales revenue is generated under long-term contracts for the supply of equipment. At the offer preparation stage, each piece of equipment is priced using the current prices of materials and labour. In addition, the fixed costs and the assumed margin on the equipment are taken into account. As a result, in the opinion of the Parent Undertaking's Management Board, the price risk is minimised.

Nevertheless, the achievement of the Group's strategic objectives concerning product prices may be hindered by competition. If competitive pressures intensify, especially in Asian markets, they may adversely affect the Group's ability to meet its planned financial results. The Management Board of the Parent Undertaking believes that the SECO/WARWICK Group is now engaged in a number of activities to strengthen its market position and increase its competitive lead by offering high quality services and comprehensive solutions, ensuring that its product mix is flexible, enhancing its existing and building new competence, using state-of-the-art technologies and developing new technological solutions. While the Group is unable to totally eliminate the risk associated with the impact of competition on its planned financial performance, it has managed to substantially reduce that impact.

### 36.4 Capital Management (calculations Note 38)

The Group's capital management relies on a sustainable financial policy, designed to secure financial resources sufficient to finance the Group's business development, while ensuring that its financing structure and liquidity levels are adequate. The Group's capital is defined as the sum of equity and net debt.

The Group's capital management policy takes into account two key elements:

- operating performance in the context of investment and development plans,
- dividend policy and the external debt repayment schedule.

In order to combine these factors, the Group periodically defines its financing structure framework. The current targets under the capital management policy are as follows:

- current ratio – in the range from 1.5 to 2.5,
- quick ratio – over 1.

The capital management policy adopted by the Group requires it to maintain a degree of financial discipline, while giving it enough flexibility to support profitable development.

Capital management is also centred around the goal of maintaining a predetermined level of liquidity which allows the Group both to pay its external debt as it falls due and to finance the expenditures connected with the Group's business risk. That goal is pursued for instance by maintaining available credit facilities that may be drawn when the need arises.

### 36.5 Liquidity Risk

Liquidity risk is the risk that the Group may face problems with meeting its financial liabilities. Liquidity risk is managed by projecting future cash flows, analysing the relation of liquid assets to cash flows, monitoring liquidity ratios based on balance-sheet items and ensuring constant access to various sources of financing at the level of the individual members of the Group.

The Group also manages its liquidity risk by maintaining available unused credit facilities which serve as a liquidity reserve securing solvency and financial flexibility.

### 36.6 Credit Risk

The Group pursues a policy of entering into sales agreements only with customers whose reliability it has checked. Management believes that thanks to this policy there is no additional credit risk beyond the level defined by the impairment losses recognised with respect to uncollectible trade receivables. There are no past due receivables that would not be classified as uncollectible. The SECO/WARWICK Group's receivables by delinquency period are presented in Note 18.

## 37. MANAGEMENT STOCK OPTIONS

On April 29th 2009, the General Shareholders Meeting approved the key assumptions of the Incentive Scheme of SECO/WARWICK S.A. ("the Incentive Scheme"). The Rules of the Incentive Scheme were adopted by way of the Supervisory Board's resolution on July 27th 2009. The Company plans to implement the Incentive Scheme in the years 2009-2011, while the subscription warrants distributed among the eligible scheme participants may be exercised on or after January 2nd 2012, but no later than on June 30th 2017.

### Cost of the Incentive Scheme

The Company assumes that it is not possible to reliably measure that the fair value of the management stock option scheme as at the grant date, i.e. April 29th 2009. In accordance with IFRS 2.24, in such cases an entity is required to adopt an accounting approach based on intrinsic value of the instruments (the price of the underlying stock less the exercise price). Under the intrinsic value model:

- intrinsic value is remeasured at each reporting date from the grant date until final settlement,
- at each reporting date during the vesting period, the cumulative expense is measured as the product of the instrument's intrinsic value as at that date and the portion of the vesting period lapsed; any changes in the cumulative expense are recognised in profit or loss,
- any changes in the intrinsic value of the options from the vesting date until final settlement should be recognised in profit or loss.

Based on the foregoing, the cost of the management stock option scheme as at December 31st 2009 has been estimated as follows:

|                                      |           |
|--------------------------------------|-----------|
| Share price as at December 31st 2009 | PLN 19.00 |
| Exercise price in 2009               | PLN 18.96 |
| Option intrinsic value               | PLN 0.04  |

|  |                  |
|--|------------------|
| Number of the management stock options                 | 300,000          |
| Vesting period   | 3 years          |
| Portion of vesting period lapsed at the reporting date | 1/3              |
| Estimated number of options granted                    | 100% x 1/3       |
| Option intrinsic value                                 | PLN 0.04         |
| <b>Cost for the period</b>                             | <b>PLN 4,460</b> |
