

Edwards Vacuum

Edwards are a world leader in the design, technology, manufacture and service of vacuum pumps for a wide range of applications, tailoring solutions to our customers' needs.

For 101 years Edwards has been at the forefront of vacuum pump technology, providing equipment that is integral to scientific, manufacturing and R&D processes for an increasingly diverse range of industries, helping to make these cleaner, smarter, economical and environmentally friendly.

Edwards' combination of applications' expertise, product portfolio, engineering strength and global service presence puts them in a unique position to be able to deliver or work with its customers to design the best solution for their application.

Edwards employs around 6250 people worldwide and has a physical presence in over 30 countries. Its headquarter is located at the Global Technology Centre (GTC) in Burgess Hill, UK.
